

Accident Analysis Software User Manual

The screenshot shows a software application window titled "Accident Analysis". The interface includes a top navigation bar with tabs for "Dataset", "Analyse", "Alcohol", and "Location". Below the navigation bar, there are search and filter fields for "Date" (set to 1/ 7/2013 to 21/ 3/2019), "Accident Type" (set to All types), and a "Search" button. The main content area displays a table of accident data with the following columns: No, Date, Time, Type, Day, Severity, Longitude, Latitude, LGA, Region, Fatalities, Injuries, and Alcohol. The data in the table represents accidents from July 1, 2013, to July 3, 2013, across various locations and categories.

No	Date	Time	Type	Day	Severity	Longitude	Latitude	LGA	Region	Fatalities	Injuries	Alcohol

Setting Up:

Requirements:

Ensure before using the software, you have the following libraries installed:

- Pandas
- WxPython
- Numpy
- Matplotlib
- Pycsvschema
- Sqlite3
- Distutils
- Wsgiref
- Python 3.7
-

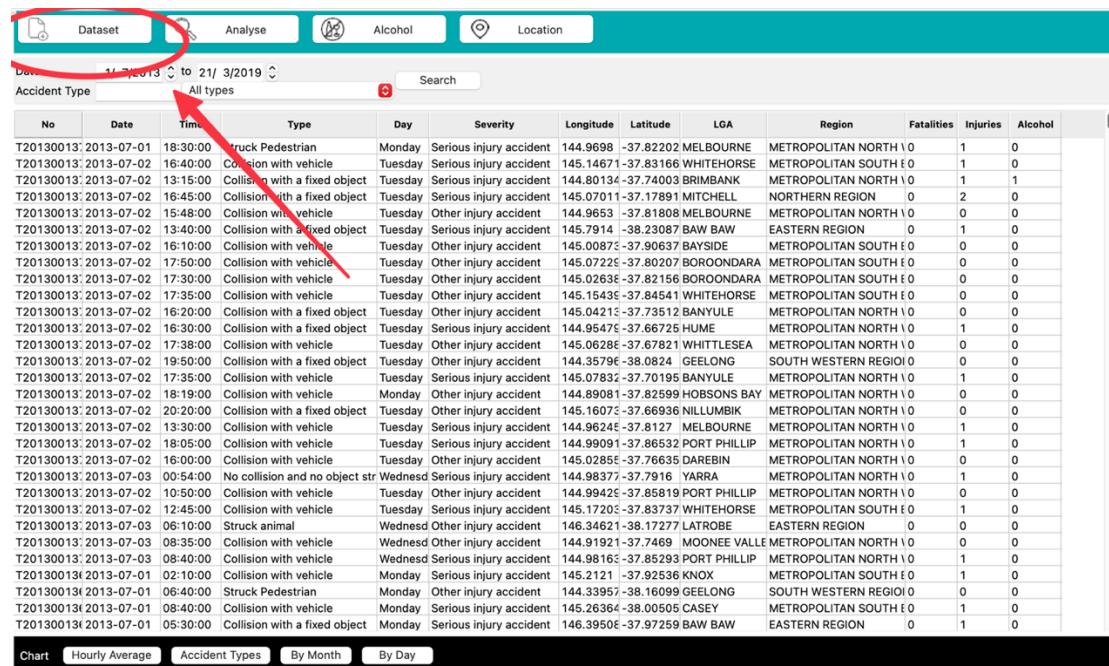

Launching the software

Open a command line application such as Terminal and move to 'app' directory that contains files for this software. Prompt the following command.

```
pythonw main.py
```

This should open the software.

Select a Dataset by clicking the 'Dataset' button

Chart Hourly Average Accident Types By Month By Day

Navigate to desired dataset and click 'open'

The file should be a comma separated CSV file containing required columns.

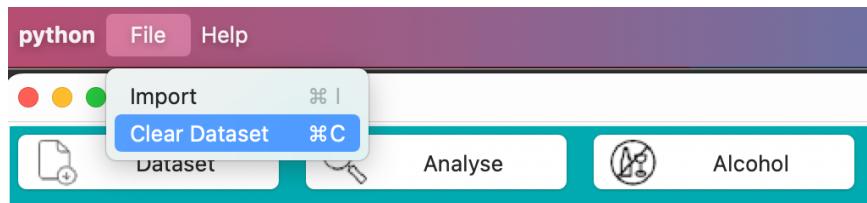

The CSV file will be converted and saved in the local database.

By selecting a new file from clicking “Dataset”, the dataset can be updated with the new dataset file.

Click on Alcohol button

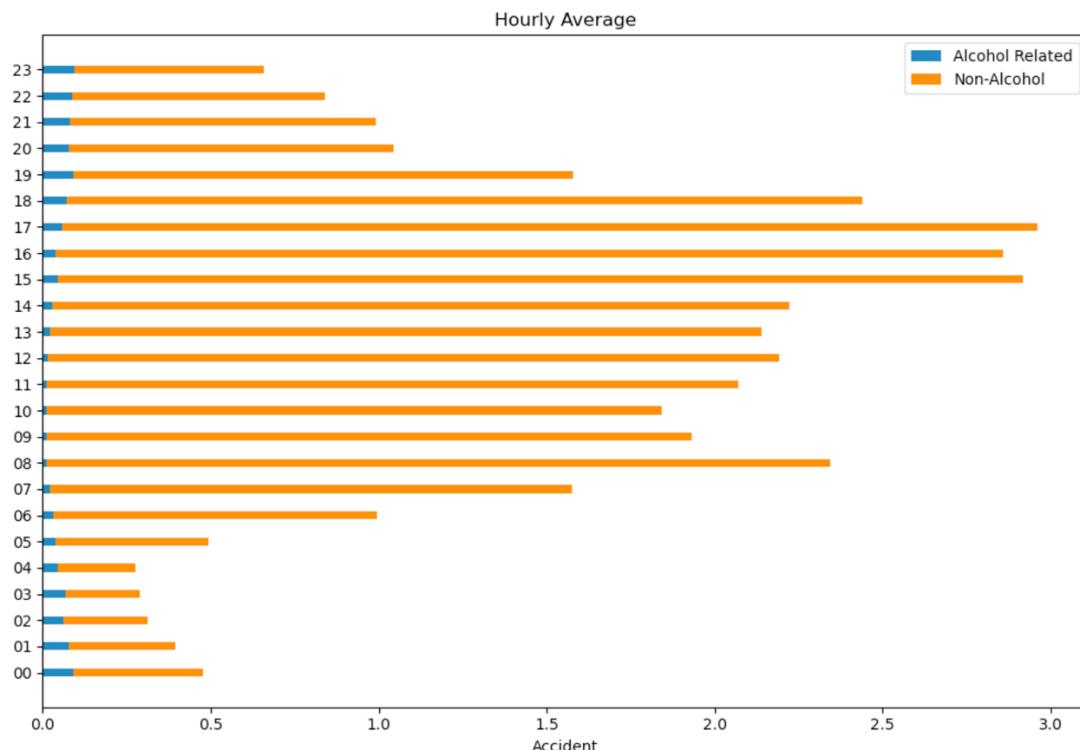

The screenshot shows a table of accident data. At the top, there are four tabs: 'Dataset', 'Analyse', 'Alcohol' (which is circled in red), and 'Location'. Below the tabs, there are filters for 'Date' (1/ 7/2013 to 21/ 3/2019) and 'Accident Type' (All types). A search bar is also present. The main table lists accidents from July 2013 to March 2019, including columns for No, Date, Time, Type, Day, Severity, Longitude, Latitude, LGA, Region, Fatalities, Injuries, and Alcohol. The 'Alcohol' column shows values of 0 or 1 for each accident.
